

# Cybersecurity Quick Tips to Becoming a Superhuman Firewall

Everywhere we turn there seems to be a new cyber threat to look out for. We may not be able to stop everything, but together we can create a superhuman firewall that stops criminals in their tracks!

Use Multi-Factor Authentication to Protect Your Accounts

Protect Your Mobile Devices

Create Strong Passwords

Use a Password Manager

Perform Software Updates

Check Your Privacy and Security Settings

Use the SLAM Method to Verify Email Legitimacy  
SLAM stands for:

-  **Sender**
-  **Links**
-  **Attachments**
-  **Message**

Be Aware, Don't Overshare

Encrypt Your Devices and Data

Verify All Financial Transactions

Use Anti-Virus and Anti-Malware Software

Think Before You Click

Only Store Sensitive Information in Secure Places

Review Online Accounts and Credit Reports Regularly

Monitor Your Dark Web Presence

Ensure That Your Security Awareness Training Is Ongoing

Do Your Research  
If it seems too good to be true, it probably is!

Don't Use Public Wi-Fi to Log In to our Accounts

Encourage a Culture of Cybersecurity

Put Cybersecurity First

Never Believe That You're "Secure Enough"

Beware of Social Engineering

Close or Delete Unused Accounts

Be Vigilant of the Latest Cybersecurity Trends

Never Leave Your Devices Unattended

Properly Dispose of Electronic Media

Plan for the Unexpected

Don't Plug Unknown Devices into Your Computer

Protect IoT Devices

Back Up Your Data Regularly

Stay On Guard  
If something looks suspicious, it probably is!
